International Youth Nuclear Congress

# INTERNATIONAL YOUTH NUCLEAR CONGRESS

The International Youth Nuclear Congress was founded in 1997 with the purpose of creating a bridge between generations of nuclear professionals across borders and creating a platform for knowledge transfer and networking.

## IYNC missions

- PROMOTE FURTHER PEACEFUL USES OF NUCLEAR SCIENCE AND TECHNOLOGY

- DEVELOP NEW APPROACHES TO COMMUNICATE THE BENEFITS OF NUCLEAR POWER

- TRANSFER KNOWLEDGE FROM THE CURRENT NUCLEAR GENERATION TO THE NEXT

- PROVIDE A PLATFORM FOR PROFESSIONAL NETWORKING AMONG FUTURE LEADERS IN THE NUCLEAR INDUSTRY FROM AROUND THE WORLD

- TRANSFER KNOWLEDGE ACROSS INTERNATIONAL BOUNDARIES

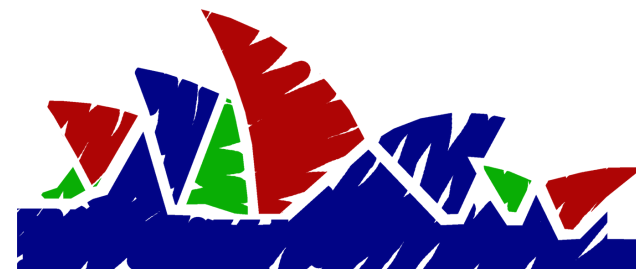

## IYNC ACTIVITIES

The International Youth Nuclear Congress offers a number of opportunities for members to engage and benefit from the IYNC network, for example:

- **Biannual Conference:** young and senior professionals from all around the world come together at IYNC conferences to share their knowledge, expertise and vision on various fields of the nuclear sector. The next IYNC conference will be held in 2020, in Sydney, Australia.
- **Mentoring Program:** senior professionals and industry leaders conduct one-on-one, targeted career conversations with young professionals
- **Innovation4Nuclear:** The I4N contest aims to propose new and innovative nuclear technologies, applications, or systems that contribute to the United Nations Sustainable Development Goals.

## IYNC2020 CONGRESS IN SYDNEY, AUSTRALIA: DIVERSITY IN NUCLEAR

# IYNC2020 SYDNEY

## 8 - 13 MARCH 2020

IYNC and the Australian Young Generation in Nuclear (AusYGN) will hold the IYNC2020 conference in Sydney, Australia, in March 2020. The conference will fall under the theme *"Diversity in Nuclear"*.

IYNC2020 aims to promote and encourage the diversity of people in the nuclear sector. Diversity comes in many forms, including gender, culture, educational background, professional experience and geographical location. IYNC2020 will also showcase the diversity in the peaceful uses and applications of nuclear science and technology.
